EMI Clamp Filter [TM55 series]

FEATURES

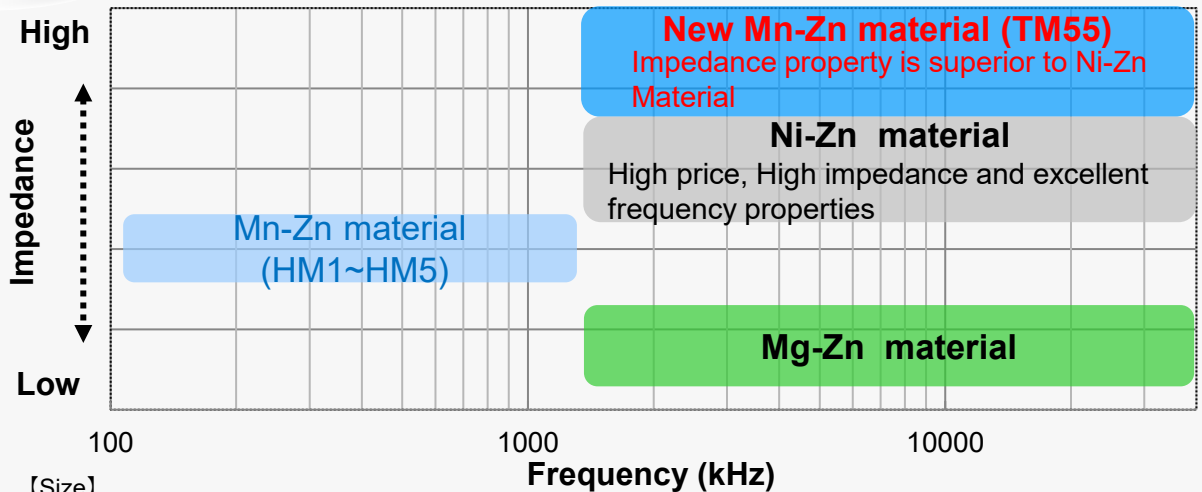

TODA KOGYO group manufactures EMI clamp filters (TM55 series) of Mn-Zn ferrite core. They have superior noise reduction performance to Ni-Zn ferrite core products.

CHARACTERISTICS

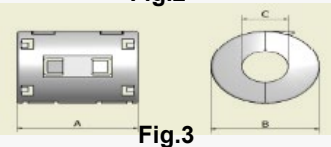

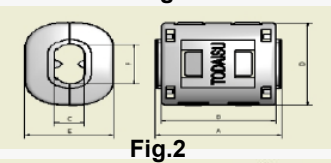

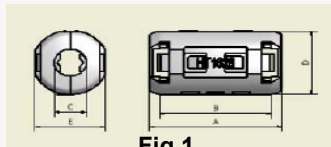

- 1 **Excellent noise reduction performance**
The EMI clamp filters can reject conductive or radiation noise at each specified frequency.
- 2 **Possible to customize**
Various shapes and specifications can be supplied according to customer requests.
